Proposal for 4 in 1 Emergency tool

Our last 2 classes for CERT did not contain a gas valve/water shut off tool for their back pack. I would like to order 72 new 4 in 1 Emergency tools to outfit our next CERT class and issue the rest to our last CERT class (2011). Previous CERT classes have all been issued this type of gas valve/water shutoff tool.

Attached is a picture of the tool and cost for 72 tools.

(72) 4 in 1 Emergency Tools @ 11.23 = \$ 808.56

Shipping would be UPS, the company named On Duty could not provide me with a shipping price at this time. I would estimate this cost to be around \$50.

Total cost for 72 gas valve/water shut off's would be \$858.56.
