**Los Altos Hills County Fire District
Barricades for ARK Parking lot
2/20/13**

In setting up our parking lot security for the ARK, we currently use yellow barricade tape. This works well to let people know not to enter the area, however since some of our equipment is staged in driveway areas we need to have a better way to show people that may be driving in that this area is closed to all traffic.

I am proposing that we purchase Portable High Visibility Safety Barricades. I am looking to purchase (6) 6" x 8' Reflective Rails and (12) Economy A-Cade Rail Holders. This would give us a total of 6 barricades to be set up blocking vehicle traffic.

Attached are examples of the barricades.

Cost for these barricades including shipping are \$ 862.29

These would be purchased through:
Traffic Safety Store
P.O. Box 1449 West Chester PA 19380
